

## GET YOUR FREE IAQ ASSESSMENT

Fellowes understands that each indoor environment is a complex ecosystem effected by factors such as heating, cooling and ventilation systems, building construction, and age as well as factors outside of the building's envelope such as geographic region, contaminants and more. Fellowes offers comprehensive assessments to help you determine the IAQ levels for your facility so you can take action where needed.

### Get Your Complimentary IAQ Assessment

Contact us today to book your complimentary Indoor Air Quality Assessment which includes placement of our Signal IAQ monitoring device in key areas you'd like to review.

Each Signal will track the area's overall air quality over a designated period including the following metrics:

- PM2.5/PM10
- TVOCs
- CO2
- Relative Humidity
- Temperature
- Air Pressure

Once the assessment is complete, Fellowes provides you with IAQ data along with recommendations for possible remediation improvements, at no charge.

# K-12 EDUCATORS CARE ABOUT CLEAN AIR

**97.5%** of Educators surveyed believe "Clean indoor air should be a right for all students and school employees."

Yet only **26%** rate the indoor air quality in their classroom as Good or Excellent.

Only **17%** of teacher requests for IAQ improvements were granted.

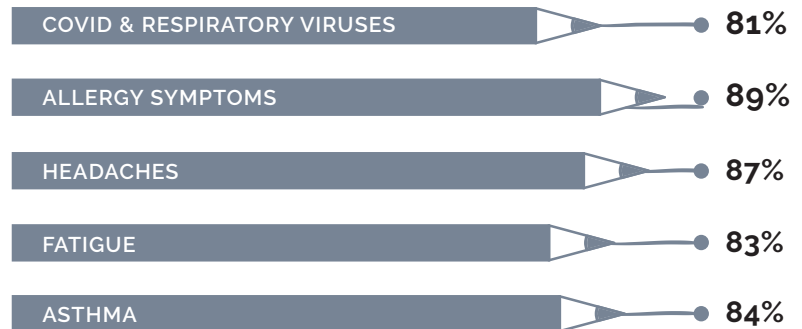

Teachers claimed that school district leaders **rated indoor air quality as the lowest priority** amongst these other facility-related items:

1. Classroom technology
2. Athletic facilities
3. Classroom surfaces
4. HVAC / temperature control
5. Restroom cleaning
6. Indoor Air Quality

An alarming **40%** reported they do not have a single air purification unit in the entire school.

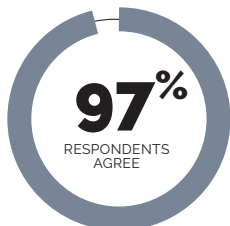

Subsequently, **10%** of teachers said they purchased their own air purification units for their classrooms, at their own expense.

How concerned are you that poor indoor air quality in your building could contribute to contracting the flu, RSV, or other viruses?

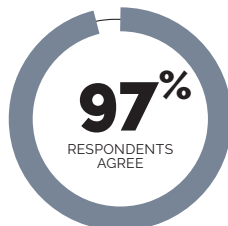

#CleanAirMatters

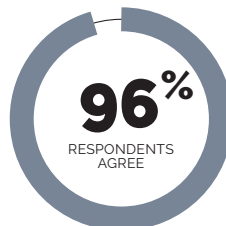

## EDUCATOR PERCEPTIONS CLASSROOM'S AIR QUALITY

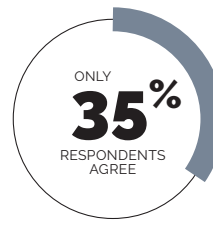

My school/district has a responsibility to provide clean air in my classroom.

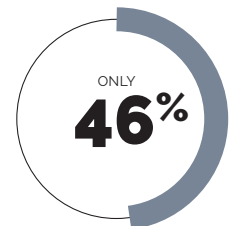

Clean indoor air helps me perform my best at work.

Clean indoor air has a direct impact on how my students perform in the classroom.

My school made or is planning to make improvements to indoor air quality in my classroom.

Of teachers completely or somewhat agree that their school has made or is planning to make improvements.
