

QR CODE PROJECT

Teacher Directions:

QR codes are fun, interactive, and any student with a smart device can access the content linked to the code. To use the QR Code Project to enhance your word wall, ask students to follow the directions on the next page carefully, creating a brief video that teaches other students a word from your word wall. Next, provide students with your email address so they can send you their video.

Download the video to your Google Drive (or another cloud system). Copy the link to your video to a QR Code Generator. I use this one: <http://www.qr-code-generator.com/>

Once your QR code is generated, download it, print it, and hang it on your wall next to the word it defines. Enjoy seeing students access the words with their smart devices and instantly make learning vocabulary more engaging.

QR CODE PROJECT

Your Task:

1. Choose a word from our word wall.
2. Use a smartphone or iPad to create a brief video (no longer than three minutes) teaching classmates the meaning of the word, including figurative and connotative meanings.
3. Provide examples of the word in use.
4. Email the video to me. My email: _____
5. I will create and print a QR code that will link to your video. Your classmates can scan the QR code to watch your videos and learn!
