

# Sort and Count Your Coins

Here's a fun way for your child to practice identifying and calculating the value of money.

**Mission:** Challenge your child to search for spare change around your home (don't forget the laundry area and the car!). Then sort and count the coins by type, record them on the chart below, and tally the total value.

COIN	HOW MANY I FOUND	TOTAL VALUE
	_____	_____
	_____	_____
	_____	_____
	_____	_____

Use this space for your math:

<b>TOTAL</b>					
_____ + _____ + _____ + _____ = _____					

All done? Have your child check their work online using the **Regions Bank change calculator** at [bit.ly/3cnDWMa](https://bit.ly/3cnDWMa).
